GENERAL REMARKS

The weather for the week has been favorable throughout the corn belt. Re. A New Local Anaesthetic Accidentally cent rains have greatly improvered the cendition of that crop, but owing to the lateness of rains in the corn producing Alabama west to Texas, the weather for the week has improved the crop condi tions, and the cotton harvest is progressing, but more rain would benefit the crop. In the central part of Arkansas and in North and South Carolina an excess of rain for the week is reported unfavorable for the cotton crop.
